SUMMARY

Computer Engineering graduate (2026) applying for AI/ML engineer roles. Six-month AI and data internship at Astreya (Looker Studio, Python, SQL, Gemini API), with projects in customer segmentation, LLM apps and neural networks.

EDUCATION

A.P. Shah Institute of Technology, Thane (University of Mumbai) 2022 – 2026
Bachelor of Engineering in Computer Engineering; CGPA: 7.56 / 10 Class XII: 63% | Class X: 82%
Relevant coursework: Artificial Intelligence, Data Structures and Algorithms, Cloud Computing, Software Engineering

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java, C++
Machine Learning: scikit-learn, TensorFlow, Keras, pandas, NumPy, Matplotlib; regression, classification, K-Means clustering, RFM analysis, model evaluation (precision, recall, F1-score)
Generative AI & NLP: Google Gemini API, prompt engineering, LLM text generation, keyword extraction and matching
Data & Tools: Looker Studio, ETL pipelines, Apache Flink, Jupyter, Google Colab, Streamlit, Git, GitHub
Web & Cloud: React, Next.js, Node.js, Express, MongoDB, REST APIs, AWS, Google Cloud

EXPERIENCE

Astreya Consultancy India Pvt. Ltd. Jul 2025 – Dec 2025
Data Interpretation and AI Intern *Remote*

- Built **Looker Studio** reporting dashboards on **Python and SQL** pipelines that clean, validate and transform data.
- Helped design the first version of an insights framework that pairs ML models (scikit-learn) with the **Google Gemini API** to flag trends and anomalies and explain them in plain language.
- Automated recurring reports, saving about **25 hours of manual work a month**.
- Evaluated new AI tools for internal use and wrote recommendations on where each one fit into existing workflows.

PROJECTS

Customer Segmentation Pipeline | *Python, pandas, scikit-learn* *Individual project*

- Computed **RFM** (recency, frequency, monetary) scores from the transaction data of **10,000+ customers**.
- Grouped customers with **K-Means clustering** and profiled each segment's spending and purchase habits.
- Built an interactive dashboard of segment sizes and buying patterns to guide targeted offers and product placement.

AI Resume Builder with ATS Scoring (QuickResume) | *Next.js, Google Gemini API, NLP* *Team project*

- Generates tailored resume content from user details with the Gemini API and shows a live preview while editing.
- Scores resumes against a job description through keyword matching and generates interview questions for the role.

Handwritten Digit Classifier | *TensorFlow, Keras* github.com/NishantSingh00001/tensorflow-digit-classifier

- Trained a feed-forward neural network (128-unit hidden layer, 20% dropout) on MNIST to **97.7% test accuracy**.
- Normalised pixel inputs, trained with Adam and sparse categorical cross-entropy, and saved the model for inference.

Other projects: Real-Time Chat Application (MERN, Socket.IO; 1,000+ users), AURA wellness web app (JavaScript; live at aura-nishant.netlify.app), CrossBridge WhatsApp-Telegram message bridge (Node.js, MongoDB).

CERTIFICATIONS

- Machine Learning Specialization, DeepLearning.AI and Stanford (Coursera); IBM Data Science Professional Certificate
- Confluent Certified Data Streaming Engineer: Apache Flink (2026); Generative AI Virtual Internship, AWS (2026)
- IBM SkillsBuild AI Skills Accelerator: six IBM micro-credentials in ML, NLP and generative AI (2026)

ACHIEVEMENTS & ACTIVITIES

- Led team CodeBaku at a GenAI hackathon, building MoodMuse: turns a user's mood into an AI painting and poem.
- **Smart India Hackathon 2024** participant: multilingual museum ticket-booking chatbot (Rasa, Node.js, MongoDB).
