SUMMARY

Computer Engineering graduate (2026) applying for software engineering roles. Builds full-stack apps with React, Node.js, Express and MongoDB, including a real-time chat app used by 1,000+ people and a live wellness app in plain JavaScript.

EDUCATION

A.P. Shah Institute of Technology, Thane (University of Mumbai) 2022 – 2026
Bachelor of Engineering in Computer Engineering; CGPA: 7.56 / 10 Class XII: 63% | Class X: 82%

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, C++, SQL
Frontend: React, Next.js, HTML5, CSS3, responsive design, SVG
Backend: Node.js, Express, Spring Boot, REST APIs, Socket.IO (WebSockets), JWT authentication, webhooks
Databases: MongoDB, MySQL
Tools & Cloud: Git, GitHub, Netlify, AWS, Google Cloud, Google Gemini API, Twilio API, Apache Flink
CS Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Astreya Consultancy India Pvt. Ltd. Jul 2025 – Dec 2025
Data Interpretation and AI Intern *Remote*

- Wrote **Python and SQL** pipelines to clean, validate and transform raw data for **Looker Studio** reporting dashboards.
- Automated recurring reports, saving about **25 hours of manual work a month**.
- Helped design the first version of an insights framework that connects ML models to the **Google Gemini API** and explains trends and anomalies in plain language.

PROJECTS

Real-Time Chat Application | *MongoDB, Express, React, Node.js, Socket.IO* *Team project*

- One-to-one and group chat with instant message delivery over **WebSockets (Socket.IO)** and file sharing.
- **JWT**-based signup and login, with users, chats and messages stored in MongoDB; used by **1,000+ people**.

AURA: Health and Wellness Web App | *HTML, CSS, JavaScript, SVG* aura-nishant.netlify.app | GitHub

- Single-page app with activity rings, workout sessions, meal and macro logging, water tracking and mood check-ins.
- Written in plain JavaScript with no framework: one state class that saves to **localStorage**, animated **SVG** rings, and a guided breathing exercise.
- Deployed on **Netlify**; built independently during the Impacteers Future Jobs Program.

CrossBridge: WhatsApp-Telegram Bridge | *Node.js, Express, MongoDB* github.com/NishantSingh00001/crossbridge

- Forwards messages between Telegram and WhatsApp (Twilio) by receiving **webhooks** and normalising each payload.
- Designed MongoDB schemas and **REST endpoints** for users, linked accounts, bridges and message history.

AI Resume Builder with ATS Scoring | *Next.js, Google Gemini API* *Team project*

- Drafts resume content with the Gemini API and scores resumes against a job description by keyword matching.
- Includes user accounts, saved resumes, a live preview and interview questions generated for the chosen role.

Other projects: Customer Segmentation Pipeline (Python, scikit-learn, K-Means; 10,000+ customers), Handwritten Digit Classifier (TensorFlow; 97.7% test accuracy).

CERTIFICATIONS

- Juniper Networks Certified Associate, Cloud (JNCIA-Cloud); Zscaler Zero Trust Cyber Associate (2026)
- Confluent Certified Data Streaming Engineer: Apache Flink (2026)
- AI-Powered Cloud Engineer Virtual Internship, Amazon Web Services (2026)
- Machine Learning Specialization, DeepLearning.AI and Stanford (Coursera)

ACHIEVEMENTS & ACTIVITIES

- **Smart India Hackathon 2024** participant: museum ticketing chatbot with payments and QR tickets (Rasa, Node.js).
- Benchmarked Synk's browser-based virtual world with 40+ concurrent users: 120 FPS average, 9.3 ms p95 frame time.
